

SmartClaim AI: Google Colab Streamlit Guide

STEP 1: (opens project in colab)

```
!git clone https://github.com/ahmadnadeembutt/smartclaim.git
```

STEP 2: (installs requirements)

```
%cd smartclaim  
!pip install -r requirements.txt
```

STEP 3: (gives IP adress)

```
%cd smartclaim  
import urllib.request  
print('Password/Endpoint IP for LocalTunnel is:', urllib.request.urlopen('https://ipv4.icanhazip.com').read().decode('utf8').strip())
```

example output:

```
/content/smartclaim/smartclaim  
Password/Endpoint IP for LocalTunnel is: 34.13.184.102
```

copy the ip address ----> **34.13.184.102**

STEP 4: (app link)

```
!streamlit run app.py &>/content/logs.txt &  
!npx localtunnel --port 8501
```

example output:

```
■■■■■■■■■■your url is: https://shaky-regions-walk.loca.lt
```

click the link -----> **https://shaky-regions-walk.loca.lt**

now paste the copied code (**34.13.184.102**)

the app will be opened
